

Introduction

Name: ZL-2801A Three-axis button life testing machine

Product Introduction:

This machine has a wide range of uses, and can test various keys and the service life of the keyboard.

Machine Principle:

This machine is a three-axis key life testing machine. It uses a motor to drive the screw to move the worktable up and down, so that the keys or the keyboard and the probe move relative to each other. The three axes are independently controlled, and different speeds and times can be set.

Zhongli instrument, makes your laboratory more professional.

Main Feature:

A good grip for accurate and productive experiments

Probe can be moved in all directions

Digital display counter, can count accurately, automatically stop when the set times are reached

Technical Parameter:

Test load	80-500g
Speed input method	Adjustable knob
Test times	0-99999999 times can be set
Motor	AC variable speed motor
Machine size	540×420×920mm
Power source	1 ϕ , 220V, 6A or specified
Weight	About 65kg
